

JOURNAL OF PLASMA PHYSICS

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, CB3 9EW England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92037, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

© Cambridge University Press 1976

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) Volume 15 and 16 (1976) is £23.00 net (US \$75.00 in the U.S.A. and Canada). single parts cost £11.00 net (US \$30.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 15

PART 1 FEBRUARY 1976

The method of averaged Hamiltonian and the two-stream explosive instability. Z. SEDLÁČEK	page 1
General stability analysis of force-free fields. Part 1. General theory. J. KRÜGER	15
General stability analysis of force-free fields. Part 2. Application to continuous and discrete spectra of α . J. KRÜGER	31
Collisional destruction of Bernstein modes in the high-frequency regime. W. ALLEN and J. J. SANDERSON	41
A Hamiltonian formulation in electrodynamics of charged moving fluids. I. MERCHES	49
The importance of trapping in strong plasma turbulence. P. ROLLAND	57
Effect of wave-particle interaction on recurrence of nonlinear ion wave. S. WATANABE	67
Temperature anisotropy instabilities in a plasma of two ion components. D. S. LEMONS and S. P. GARY	83
Nonlinear interaction between two electrostatic harmonics in a plasma. F. VERHEEST and G. J. LEWAK	91
Drift instabilities in anti-loss-cone plasmas. B. BUTI	105
Electromagnetic and electrostatic waves in a multi-component plasma near the lower hybrid frequency. M. HAMELIN and C. BEGHIN	115
The Green's function for waves in a homogeneous anisotropic absorbing plasma. J. A. BENNETT	133
A ray expansion with matrix coefficients for sources in absorbing anisotropic media. J. A. BENNETT	151
Lagrangian density for a collisional plasma. Y.-K. M. PENG	165

PART 2 APRIL 1976

Ion heating by the electrostatic ion cyclotron instability: theory and experiment. D. R. DAKIN, T. TAJIMA, G. BENFORD and N. RYNN	175
The influence of mean shear on Alfvén-internal wave propagation. R. J. HARTMAN	197
Multiple spatial scaling and the weak-coupling approximation. Part 1. General formulation and equilibrium theory. P. E. KLEINSMITH	223
Nonlinear Rayleigh-Taylor instability in hydromagnetics. G. L. KALRA and S. N. KATHURIA	239

Current-driven Alfvén instability. J. V. HOLLWEG and D. F. SMITH	page 245
The thickness of a resistive sheath in a magnetic separatrix J. D. KILKENNY	253
Dynamics of a triple inverse pinch. P. J. BAUM, A. BRATENAH and M. COWAN	259
Like-particle collisional interactions in an inhomogenous plasma. F. SANTINI and F. ENGELMANN	269
Electrostatic plasma turbulence. Part 1. Turbulent plasma diffusion across a magnetic field. H. C. BARR and T. J. M. BOYD	279
The generation of interpenetrating plasma flows in an expanding discharge. H. A. DAVIS, M. A. MAHDAVI and R. H. LOVBERG	293
Theory and computer simulation of electron beam-plasma interactions in unbounded systems. S. CUPERMAN, I. ROTH and W. BERNSTEIN	309

PART 3 JUNE 1976

High-frequency ion electrostatic instabilities in mixed warm-cold plasmas. L. GOMBEROFF and S. CUPERMAN	325
Relativistic nonlinear plasma waves in a magnetic field. C. F. KENNEL and R. PELLAT	335
Nonlinear development of the plasma-beam instability in a magnetized plasma. T. YAMAMOTO	357
Nonlinear Landau damping of a broad-band spectrum of electron plasma waves in a bounded plasma. G. MATTHIEUSSENT	371
Analytical study of crossed atom-laser beam plasma diagnostics. K. J. NYGAARD	381
Propagation of magnetohydrodynamic waves into a collisionless current layer. A. HRUŠKA	389
Analytical derivation of the H.F. electrostatic potential created by an oscillating point source in a streaming water-bag plasma. E. MICHEL	395
Dynamics and conservation laws in electrostatic plasma turbulence. K. ELSÄSSER and H. SCHAMEL	409
Three dimensional equilibria in the magnetohydrodynamic approximation. M. L. WOOLLEY	423
Electrostatic ion cyclotron waves: plasma heating, frequency shifts and linewidths. G. BENFORD	431
Propagation of electronic longitudinal modes in a truncated Maxwellian plasma. J. P. TREGUIER and D. HENRY	447
